

HORIZON

aiMSSP™

Horizon Industries, Ltd. aiMSSP powered by Seceon, is a multi-tier, multi-tenant platform that combines the power of dynamic SOC with the unparalleled advantage of Advanced SIEM and EDR (Extended Detection and Response) solutions from Horizon to offer defense in-depth cyber security, managed and monitored by MSSP. With all the essential tools, analytics, dashboards, controls, queries, and reports at your fingertips, it enables an elevated security posture for customers across any sector, ensuring all their digital assets - whether in the cloud, on-premise or remote workplace – **is monitored and protected effectively 24x7.**

- ✓ MSSP onboarding in 1 hour with easy Entitlements through Users and Roles
- ✓ Tiled Dashboard with summary KPIs – Security Alerts and System Alerts
- ✓ Pre-built templates for Log Archive, Notification and SSL Configuration
- ✓ Separation of data, configurations, rules, reports and assets by Tenant
- ✓ Forensic search on Raw Logs based on period-in-time and specific tenant
- ✓ Additional Threat Intelligence imported (file based) or ingested via STIX-TAXII interface

MANAGE	EXTENDED DETECTION	RAPID REMEDIATION
Incidents & Alerts	Behavioral Anomalies (ML)	Automated Response*
Threat Hunting	Advanced Correlation (AI)	Alert Based Recommendation
Policy Violations	Dynamic Threat Models	Semi-Automated Response*
Custom Alerts	Endpoint Threat Detection	Endpoint Quarantine Network
Provisioning	Network Based Detection	Based Isolation
System Health	Vulnerability Assessment	
Reporting		
Notifications		

* Remediation orchestrated through designated Firewalls, Network Access Controller and EDR Server

Do More with Less

Eliminate heavy lifting with Automat-ed Threat Detection and Remediation and serve more customers with fewer analysts that would otherwise require hours and days of tuning (correlation rules) or manual analysis by SOC.

Build Credibility with Surplus Value at Scale

Create outstanding value with comprehensive defense in-depth solutions from Horizon (aiSIEM/ aiXDR) overcoming silos and scaling from 10 employee business to 100,000 employee enterprise.

Drastically Reduce CAPEX and OPEX

Reduce Capital Expense and Operating Costs by 80% through single unified cyber security platform for monitoring, detection, remediation, policy governance and compliance.

Streamline Operational Efficiencies

Deliver value to customers with essential tools and dashboard elements for easy navigation, cloud security, endpoint deployment, threat hunting, log archival and operational oversight.

Grow Your Brand and Business

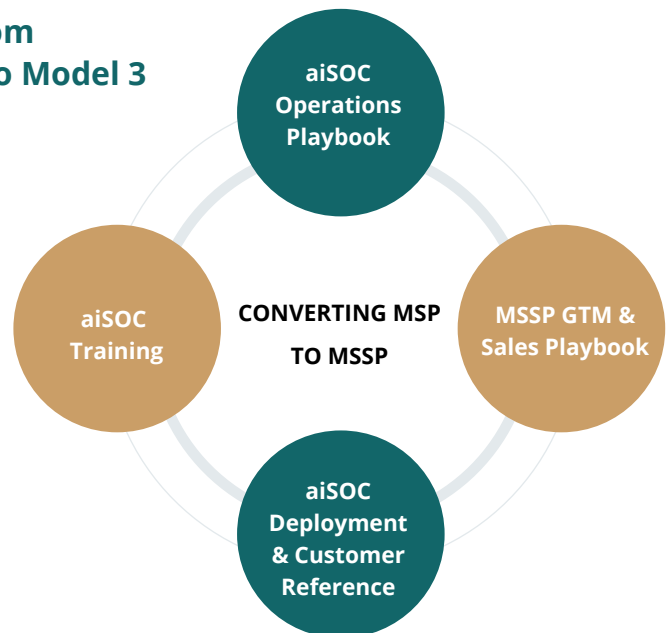

Leverage Horizon's Multi-tier Multi-tenant (Mt-Mt) design core to expand your business globally and assume the role of Master MSSP while applying artifacts of brand recognition.

BOOTSTRAP AS MSSP PLAYER OR MANAGE INDEPENDENTLY

	MODEL 1	MODEL 2	MODEL 3
